SUMMARY

Full Stack Developer with 2+ years of experience building and launching scalable software, e-commerce, and AI-based web apps. Skilled in creating full-stack solutions using TypeScript, ReactJS, NestJS, MongoDB, PostgreSQL, and Prisma from front-end UI through to back-end RESTful APIs, databases, authentication, and payment gateways. Comfortable dealing with clients and collaborating in cross-disciplinary teams to create maintainable software solutions from business requirements. Experience with Docker, Nginx, Linux, production deployment, and third-party API integration.

SKILLS

Frontend: React.js, Next.js, Redux, Redux Toolkit, Tailwind CSS, MUI, Bootstrap, HTML5, CSS3.

Backend & Databases: Node.js, NestJS, PostgreSQL, Prisma, Express, MongoDB, REST APIs.

Cloud & DevOps: Docker, Linux, Nginx, PM2, CI/CD Pipelines, AWS S3, Server Management.

Security & Integrations: OpenAI API, JWT, Unit Test, RBAC, Socket.IO, Stripe, bKash, SSL Commerz.

WORK EXPERIENCE

LetsPhish | Remote

Web Developer (Part-Time) | Aug 2024 – Jun 2026

- Contributed to the development of LetsPhish, an AI-powered cybersecurity and security awareness platform focused on phishing simulation and employee security awareness.
- Engineered interactive cybersecurity interfaces using Next.js to streamline administrator risk management.
- Developed AI-driven simulation modules that generate highly realistic phishing, smishing, vishing, and deepfake scenarios for enterprise security training.

Ejanani.com | Remote

Full Stack Developer (Part-Time) | Mar 2023 – Present

- Built and integrated RESTful APIs for e-commerce, user management, orders, products, payments, shipping, reporting, and other business workflows.
- Designed and integrated seamless checkout flows with global and regional payment gateways (bKash, SSLCommerz).
- Containerized applications using Docker and Docker Compose and managed production services using Nginx, PM2, and Linux servers.

PROJECTS

ContentPilot AI (SaaS) | [Live link](#)

Core Stack: Next.js, NestJS, Prisma, PostgreSQL, Tailwind CSS, OpenAI, Stripe, Docker, JWT.

- Architected an AI-powered SEO platform that ingests user URLs to automatically generate comprehensive page audits, SEO metrics, and actionable AI-driven improvement suggestions.
- Engineered a secure RBAC system for both frontend and backend. Planned AI-powered features including recommendations, content generation, competitor analysis.

EDUCATION & LANGUAGES

- B.Sc. in Computer Science & Engineering** - Northern University Bangladesh | 2024 – Present
- Languages:** Bangla (Native), English (Professional)
